

2018 China (Zhengzhou) Urban Water Development Expo Invitation

Exhibition time: August 31 - September 2, 2018

Venue: Zhengzhou International Convention and Exhibition
Center (Zhengdong New District CBD)

【Market Background】

“13th Five-Year” period is a critical period the completion of a comprehensive well-off society, is the implementation of the national governance system and governance capacity modernization period, and fully implement the important stage of the central city work conference spirit, to join the international community to jointly promote the new urbanization, promote green development. The sustainable development agenda of the 2030, adopted by the United Nations, puts forward the goal of building inclusive, safe, resilience and sustainable urban development.

Along with China's economic restructuring and development of energy conversion, the water sector to reform innovation, accelerate the realization of a fundamental change from extensive to intensive water saving water, the Internet and large data platform for the realization of the rigid constraints of water resources carrying capacity, adhere to the people economic and environmental balance concept, strengthen the demand management, optimize the supply structure, with water, with water, the amount of water line, because the water system should reasonably control the development degree of water resources, strengthen water resources security risk prevention and monitoring and early warning, to promote the water law and Guan Shui, to build a complete system, scientific and effective operation of the water management system, science and technology play the leading role of innovation, promote innovation and development of water.

At present, the situation of water resources in China is very severe. Serious problems

such as serious water pollution, deterioration of water ecological environment and shortage of water resources have become the main bottleneck restricting the sustainable development of economy and society. In order to promote the sustainable utilization of water resources and the transformation of the mode of economic development, promote economic and social development and the carrying capacity of water resources and environment in harmony, guarantee long-term stable and rapid economic and social development, and implement the general secretary Xi Jinping put forward the "water-saving priority, spatial equilibrium, the system of governance, hands force" of the CPC Central Committee and the government, the National People's Congress, the State Council promulgated the "on the further strengthening of city planning and construction management work of a number of opinions", "national economic and social development of the thirteenth five year plan", "National urban municipal infrastructure construction'13th five-year plan", "Suggestions on strengthening management of urban underground pipeline construction", "Guidance on promoting the construction of urban underground comprehensive pipe corridor", "Guidance on the promotion of sponge city construction", "Views on the full implementation of the river system", "Guidance on the implementation of lake system in lakes" and other documents, related tasks on the construction of city water system were deployed, laid out a clear roadmap for the construction of ecological civilization in the current and future long period of time, it has an important guiding significance to promote the sustainable development of our country. "Based on the central plains, radiating the whole country", this exhibition aims to accelerate the construction of water-saving society and water ecological civilization city, improve the efficiency and efficiency of water resources utilization, enhance the carrying capacity of water environment, reproduce the green hills and clear water, and build a beautiful China.

【Organization】

Guide | Support | Sponsors:

Henan Province Department of housing and urban rural construction

Department of Water Resources of Henan Province

Henan Province Society for Urban Studies

Henan Province Hydraulic Engineering Society

Chinese Water Industry Association

China Water Water Affairs Association

China urban water development Association

Henan Province Construction Industry Association
China Municipal Engineering Technology Exchange Center
Henan Provincial Academy of Building Research
Henan Provincial Sponge City Engineering And Technology Center
Executive organizer:
Shanghai Yahao Exhibition Co., Ltd

【Holding Place Introduce】

Henan is located in the central part of China, East and West. It is regarded as China's place and the pivot of the world. It has been invented in Henan by three major technologies of compass, paper-making and gunpowder in the four great inventions of ancient China. Henan is China's first large population, large agricultural province, large cultural province, new industrial province and large economic province. The mileage of railways, high-speed railways and expressways ranks the highest in China.

Zhengzhou International Convention and Exhibition Center is one of the central business district of Zhengzhou city the three landmark buildings, conference center and Exhibition Center is composed of two parts, construction area of 227 thousand and 600 square meters, is a set of conference, exhibition, entertainment, conference, large exhibition facilities catering and tourism and sightseeing. Zhengzhou International Convention and Exhibition Center is located in the central business district center of CBD, Zheng Dong new area. It is adjacent to 107 National Highway and Beijing Hong Kong and Macao expressway. It is 26 kilometers away from Zhengzhou Xinzheng International Airport and 7 kilometers high speed rail east station. The city takes the subway line one line exhibition center station to get off and walk. The traffic is very convenient. The area of the parking lot of the exhibition hall is 45 thousand square meters.

【Exhibition Scope】

★Building Water Supply and Drainage Area:

Plastic pipes and fittings, metal pipes and fittings, building water supply system, water supply equipment, water pump, water tank, water meters, valves, building water supply and drainage system, oil-water separation equipment, sewage lifting equipment, roof drainage system, siphon drainage system, the special single riser drainage system and drainage system on the same floor, sponge, city system the building fire control system, fire water supply equipment, building water HVAC system, auxiliary products and peripheral accessories;

★Intelligent Water Conservancy Exhibition Area:

Wisdom water water conservancy overall solutions, technology, products and services, water and water conservancy information management, automatic water conservancy informatization, water quality monitoring and early warning, water investment, water production operation management, intelligent network, intelligent water meter, water rainfall regime integrated management, disaster monitoring, early warning, monitoring of water resources comprehensive management informationization, drainage system; Water resources management protection, optimal allocation, seawater desalination and utilization, water circulation and utilization, membrane separation technology and application, and other efficient use and water-saving technology equipment;

★Sponge City Exhibition Area:

Sponge city design planning, pilot city (district county, project) construction development and overall solution; Rainwater collection and utilization system, roof siphon drainage, ground rainwater drainage, stratum drainage, osmotic emission integration system; Permeable pavement materials and technology, roof greening technical materials, roofing waterproof technical materials; Urban water system planning and design and construction, landscape water system planning and design, ecological water system planning, river and lake comprehensive management, water ecological civilization construction, water environmental protection management;

★Comprehensive Pipe Gallery Intelligent Network Exhibition Area:

Underground comprehensive pipe corridor planning and design, project management and consultation service, construction technology equipment, pipe corridor construction materials and technology; Prefabricated comprehensive pipe corridors, pipes for special pipes for underground pipes, power communication, wire and cable, hardware support, pipe and corridor waterproof, anti-corrosion, heat preservation, rust removal, fire prevention, ventilation and lighting; Intelligent pipe network solution, information management system, surveying and mapping, network monitoring, data collection management system, pipeline disease detection, urgent repair and other related control instruments and equipment.

【Exhibition Stand Charge】

Booth type	Enterprise nature	Booth-renting Costs
Standard booth	Domestic enterprises	RMB 8800/9m ² (3x3)
	joint-investment company	RMB 9800/9m ² (3x3)
	foreign-investment company	RMB 12800/9m ² (3x3)
Space-unit booth	Domestic enterprises	RMB 900元/m ² (36m ²)
	joint-investment company	RMB 1000元/m ² (36m ²)
	foreign-investment company	RMB 1200元/m ² (36m ²)

★Booth Type: Standard booth (3m*3m=9 m²)

Standard booth contains: Panel walls, Facial board with exhibitor's name (both in Chinese and English), 1 table of 2 chairs, electrical socket 15A/220V/24hours, 2 spot lights;

★Booth Type : Space-unit booth (36 m²)

The least hiring area -36 square meters and only offer space, no exhibition rack, exhibition;

Matters Needing Attention: Some services such as booth building, exhibition transportation, special exhibitors hiring etc, you can consulting committee.

【Target Audience】**Pilot Cities:**

Representative of the competent departments of pilot cities for the construction of water-saving social construction, pilot cities for water ecological civilization construction, pilot cities for the construction of sponge cities, and the pilot cities of underground comprehensive pipe corridors;

Government and Service:

Across government departments, the construction department (bureau), is built appoint, development and reform commission (NDRC), water (water) department (bureau), land and resources (bureau), the financial department (bureau), the department of environmental protection (bureau), environmental protection department (bureau), transportation department (bureau), the agriculture department (bureau), provincial forestry department (bureau), hydrology bureau, water resources commission, river (lake, river, reservoir and water resources management system of protection, long river office, hydrology and water resources survey, hydrology, water quality, water environment, urban water supply and drainage) monitoring centers, municipal administration, supply/drainage management, water saving office, bureau of parks and woods, energy administration, FangXunBan, JieNengBan, new city, new district management committee, etc.;

Construction Industry Users:

City investment and development, infrastructure construction, urban complex, real estate developers, construction contractors, decoration, decoration companies, landscape, urban greening, architects, designers, engineers, hospital, school, office units, hotels, shopping malls, buildings, property management agencies;

Public Utilities:

Municipal construction, transportation, power, communications, gas, heat, fire, water utilities, water works, sewage treatment plants, supply and drainage engineering companies; Intelligent city, architectural design institute, sponge city technical service center, urban water supply and drainage association, water conservancy association, association and other related industry organizations; Experts and scholars engaged in water science research, water ecological environment protection and management, urban water system planning and design, consulting services, etc.

Market Users:

Importers and exporters, wholesalers, distributors, agents, manufacturers, retailers, traders, investment companies, business consulting firms;

Industrial Enterprise Users:

Water conservancy, power, petroleum, chemical industry, metallurgy, steel, paper, textiles, electronics, environmental protection, pharmacy, boiler, irrigation, food, beverage, electronics, plastic, etc.

Other Related Organizations:

Newspapers, magazines, television, websites, embassies in China, foreign trade institutions, funds, securities, bank finance, venture capitalists, news media representatives, etc.

The banner features a central graphic of a city skyline with a water tower and a recycling symbol. The text is arranged as follows:

- China (Zhengzhou) Urban Water Development Expo**
- August 31 - September 2, 2018 Zhengzhou International Convention and Exhibition Center
- Four colored boxes representing exhibition areas:
 - Blue: Building Water Supply and Drainage Area
 - Purple: Intelligent Water Conservancy Exhibition Area
 - Green: Sponge City Exhibition Area
 - Red: Comprehensive Pipe Gallery Intelligent Network Exhibition Area
- Resource convergence industry interactive one-stop display platform
- 33000m² Very Large Scale 500+ Exhibitors 26000+ Visitors
- WELCOME TO PARTICIPATE**
